### Skip Bin Delivery / Pick Up

We will, to the best of our ability place the skip bin where you would like it. Unfortunately, we cannot place bins on the road or footpath without a council permit. Fines will apply. For narrow spaces, our trucks require a minimum 3m wide space to reduce the risk of damage to the truck and the customer's property.

***\* Please do not move the skip from  
its delivery position!! \****

All care is taken by our drivers to ensure the delivery and collection of the skip is carried out safely. However, Kwik Skips will not be held accountable for any damage caused to your property where the driver has adhered to the customer's instructions.

If the skip has been moved from its delivery position and there is damage caused by the driver when collecting the skip, Kwik Skips will not be held accountable.

If you ask for the skip to be delivered onto the driveway, there is always the chance of it being scratched, the skip bins are metal. We suggest for new driveways or larger skips, the customer placing timber planks down first. Kwik Skips do not supply these.

***Further charges will apply if the skip is not  
ready for collection when the driver arrives \****
